#### On the Corner.

Another matter that was taken under consideration was the sending of agents to a number of outside towns for the purposes of organizing some branch clubs, delegates were selected and they will make a report in a few days. Two of the Kickers had beat their own record for the week by announcing that they had actually been working. The labor consisting of assisting in the tak-ing down of the old walls of the burned city building which was fast becoming an eye sore to the public. These Kickers said they learned the whole trade in the few hours they worked and would soon start for Cuba to assist in taking down the walls of Morro Castle if the American fleet is not able to accomplish the task. "On The Corner" could have furnished a few men who might have been of assistance to those who had the moving of the Paine house in charge, and would have been glad to have done the same for no pay, as the house remained in the streets for so many days that people came near taking it for our new government building. It is safe to say that "On The Corner" will in the future oppose the moving of any such building through our Main street Boulevard. Barre is too large says "The Club" for any such obsolete work. These Kickers have been greatly annoyed also over the statement that a new company would be organized to take the place of Company E when that brave company leave our midst. "On The Corner" to a man say that no company can be formed here to take their place, and that no other military organization will be exempt from taxation. There is but one Company E and that is the present command of Captain Badger. There will not be any other.

There were rumors on the street so one of the Kickers stated that efforts would be made at the session of the egislature to annex the town of Williamstown to Washington county, and this would so the "Club" claimed be a good thing for this city as Martin Brook would then be a part of our own county. should be sent to the members of the next Fish Committee of the Legislature. We surely need to have our dust laid but "On The Corner" expect a few men to do it and pay the bills. No man has a right to complain unless willing to contribute a "mite."

"Shall we buy the Water Works" was the leading topic of the evening. There were as many opinions as there were kickers. The Inspector has no axe to grind in this matter, he is not the paid attorney of city or company. He never held a City office. He owns no property except a building lot near a grave yard. He has no use for "Spring" Water" and never inquires if red lemo nade contains "Brook or River water" So what he gives as gathered "On The Corner" will be as true as he is able to restore it.
